Re: FB13-02020

To Mr. Larkin:

I have been employed by the NYC Office of Chief Medical Examiner in the Department of Forensic Biology since September 2005. Presently, I am a Criminalist, Level IV. My duties included the following: supervising lower level Criminalists (Levels I-III), reviewing scientific data, performing technical review of case files, performing evidence examination and DNA analysis techniques, writing reports, testifying in court, reviewing evidence submitted to the laboratory for testing, and communicating with legal and police personnel.

On May 5, 2013, I examined a pair of jeans associated to FB13-02020 for the presence of semen. The jeans tested negative for the presence of semen, therefore no DNA testing was performed. All procedures were followed in accordance with Forensic Biology laboratory protocols, which are available on the NYC OCME/Forensic Biology website, <http://www.nyc.gov/html/ocme/html/fbio/Manuals.shtml>. Based on the results of my testing and analysis, I conclude that, if any DNA was present on the subject's jeans, it did not come from semen.

A handwritten signature in blue ink that reads "Sarah N. Philipps".

Sarah N. Philipps  
Criminalist, Level IV
